

The field diary that keeps every entry

Researchers ask for entries. Participants record them on their phone, in the moment, even offline.

Participant Android app

- Joins by QR, code or volunteer pool
- Accepts consent
- Chooses their hours
- Text, photo, video, audio, scale
- Records offline, no duplicates
- Can leave and delete their data

Researcher web portal

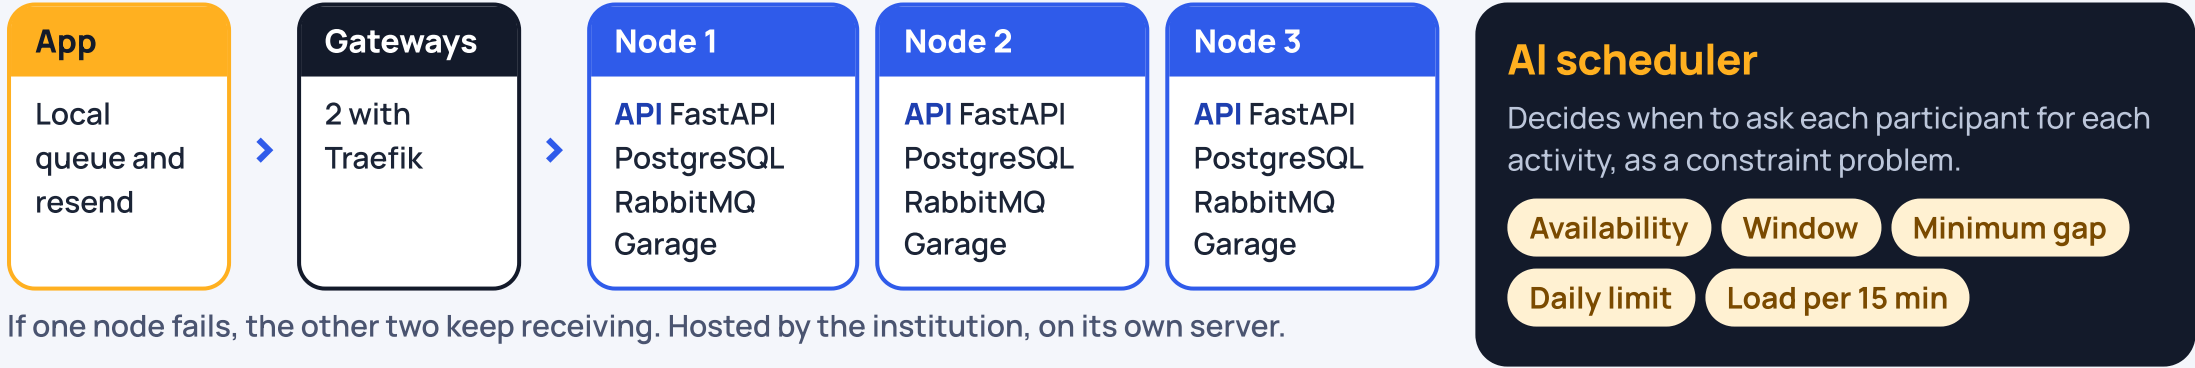

- Creates studies and activities
- Invites by code or volunteer pool
- Sees adherence in real time
- Tags and exports

Administrator web portal

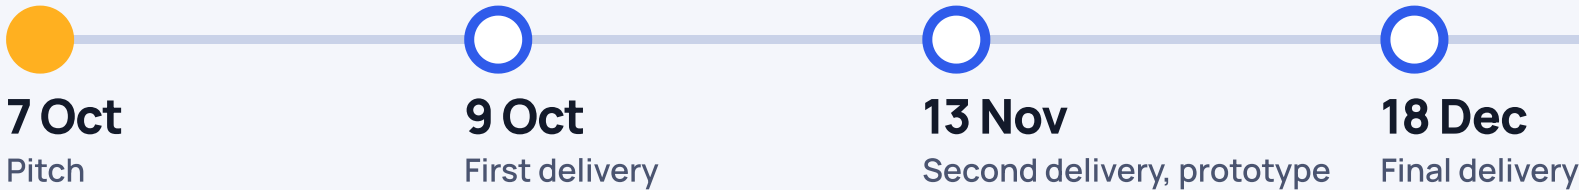

- Accounts, with TOTP code
- Overview of all studies
- Audit log
- Deletion requests

How it works three logical nodes on one Docker host, on the private Tailscale network

If one node fails, the other two keep receiving. Hosted by the institution, on its own server.

Deliveries

Tiago Cabaça 20241185 · César Rodrigues 20240449

64 design screens

BSc in Computer Engineering, 5th semester, IADE, Universidade Europeia
